10. Objectives of the Course:

Parenting Style is a system of behaviors that describes the parent and child interaction over a wide range of situation and creates an effective interaction atmosphere.

Parenting style is a determining and effective factor that plays an important role in children's psychopathology and growth. The relationship of parents with children or Parenting styles serves multiple purposes moral and psychological training, identification, growth and development of children's talent, skills, familiarizing with the rules and norms of the society from the perspective of parents are among these purposes. Parenting Styles are likely to affect children's personality traits.
