- 

**Theme of the Webinar:**

To unite in diversities is not an easy thing to do, but at the same time an unimpossible goals also. Cultural diversity, ethnicity, race, and religion are parts of identities as well as the beauty and wealth of India. In this case, the media plays a huge role in introducing and raising the awareness of the importance of practicing high tolerance amidst diversity. In order to raise awareness of the importance of the issue of diversity in India, Vidyanagar College held an online seminar with the theme, "Harmony in Diversity". The seminar invited guest speakers from within the country as well as from outside to discuss on how the media plays an important role in the movement to fight for social justice in many countries.

The present education system has become largely skill-based. The prime emphasis is on science and technology. However, science and technology can only help to provide the means to achieve what is considered valuable in terms of facilities. Value Education is a crucial missing link in the present education system. Because of this deficiency, most of our efforts may prove to be counterproductive and thus serious crises at the individual, societal and environmental level are manifesting. Values and skill complement each other. Values mean importance or participation and skills mean qualities, training, and capabilities. To fulfill our aspirations both values and skills are necessary. When we identify and set the right goals and produce in the right direction, we can reach the value domain, the domain of wisdom. Basically we must know what really is useful to achieve human happiness, the happiness to all and for all the time.

**Learning outcomes:**

- To create an awareness on Engineering Ethics and Human Values among participants.
- To instill Moral and Social Values and Loyalty.
- To appreciate the rights of others.
- To Identify the multiple ethical interests at stake in a real-world situation or practice
