Name of the Programme: Awareness Camp on Snake Bite

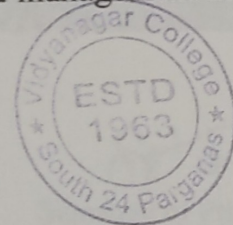

Date: 28th February 2023

No. of Participants: 132

Report:

India has remarkably the highest number of snakebite cases contributing to nearly 50% of the global snakebite deaths. Despite this fact, there is limited knowledge and awareness regarding the management practices for snakebite in the Indian population. The BAN Foundation in collaboration with Vidyanagar College celebrated National Science Day by organizing a campaign on 28th February 2023 which aimed to explore the knowledge, awareness, and perception of snakes and snakebites, first aid, and treatment amongst the community. Most of the local community was aware of the commonly found snakes and their hiding places. However, there was inadequate knowledge on the identification and classification of venomous snakes.

The awareness camp held at Vidyanagar college seminar hall on 28th February 2023 at 11.00 a.m. enlightened on snakes, snake-bites, and first aid measures for snake envenomation. There is a lot of unawareness about the Government's welfare schemes for snake-bite victims. Students were inculcated with all possible basic knowledge on snake-bite prevention and management in learned and laymen.
