**Name of the Programme: Awareness Camp on Fresh Water Conservation  
and Determination of Water Quality.**

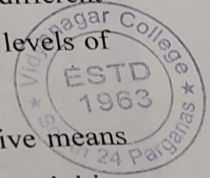

**Date:** 13<sup>th</sup> June 2023

**No. of Participants:** 27

**Report:**

In an era marked by increasing environmental challenges and concerns educational institutions are playing a pivotal role in addressing the world's pressing issues. Water considered as an elixir of life is of paramount interest. Vidyanagar College recognizes this fact and Department of Zoology along with IQAC of the college has undertaken an awareness campaign to address two very crucial environmental concerns that is fresh water conservation and determination of water quality. The awareness camp was held on 13<sup>th</sup> June 2023 in the locality of Vidyanagar College under the leadership of Dr. Sudipta Patra, Assistant Professor Department of Zoology. He enlightened the students on the socioeconomic and environmental benefits of water conservation and different conservation methods. This campaign aims at raising awareness in all levels of society about the importance of saving water.

Again, raising awareness about fresh water conservation is an effective means of proper waste management. It is important to be aware of the activities, benefits and the role played by community to overcome this rising issue. Students are advised to take all possible measures in their vicinity to prevent any kind of dumping of waste in open drains or roads which leads to an unhygienic environment. The programme ended by free sapling distribution among the villages as a step towards environment conservation.
